

PACIFIX

UNIVERSAL FAST ADHESIVES

UNIVERSAL FAST ADHESIVE is an adhesive set which consists of high viscosity cyanoacrylate adhesive and activator.

PACIFIX

UNIVERSAL FAST ADHESIVES

PROPERTIES

- High bonding strength.
- Suitable for use on vertical surfaces as it will not drip or slump.
- It is particularly suited to bonding difficult substrates which have a porous or uneven nature since it increases bonding strength by preventing the adhesive to be absorbed by the surface.

APPLICATION AREAS

- It is suitable for the bonding of a very wide range of materials, including acidic surfaces and some porous ones, where rapid bonding times are required.
- Suitable for MDF, wood, chip wood, rubber, most plastics, leather and other common substrates.
- Especially suitable for the applications where cure speed needs to be accelerated.
- Although it has a degree of gap filling ability, it is generally recommended for use on closefitting parts and fairly smooth, even surfaces.
